NETcell

OPTIMIZED FOR USE AS A DATA CENTER

NETcell is the tailor-made suit among apra's 19" cabinet systems. Individually configurable and easily expandable, it can be adapted to almost any requirement. For example, the combination of a basic and a bayed system enables an especially flexible, space-saving design. The system is particularly con-

vincing due to its unique, large-volume cable management system. Despite the design as an open rack, the NETcell system can be completely bulkheaded and enclosed in rows of cabinets, so that a highly efficient air conditioning is implemented.

582 • 19" wall rack

19" wall rack

The 19" wall rack represents a flexible, effective and cost-effective 19" alternative in the wall distribution sector.

The 19" level can be depth adjusted from 300 mm up to a maximum of 500 mm providing enough space for cable routing even for deep plug-in units.

A second 19" level at the rear of the rack allows the assembly of sliding rails to accept heavy plug-in units. The cable feed above and below is fitted with an integrated strain-relief strip.

The 19" wall rack is simple to mount since the fixing holes can be marked to the wall by using the mounted 19" rack and subsequently be drilled and screwed.

Construction:

The 19" wall rack comprises two wall brackets (1), upper and lower extraction rails (2) and a front and/or rear 19" level (3).

Finish:

Wall bracket: RAL 7035 light grey
Extraction rails / 19" level: galvanised
